YaraLiva™ TROPICOTE™

YaraLiva TROPICOTE		% w/w
Nitrogen (N)	as nitrate	14.4
	as ammonium	1.1
	TOTAL	15.5
Calcium (Ca)		18.8

Product Performance

YaraLiva TROPICOTE offers water soluble calcium for improved growth, reduced stress, better crop quality and shelf life along with readily available nitrate nitrogen for rapid growth. In combination, the nitrate nitrogen helps improve the uptake of calcium.

Unique Coating Technology

YaraLiva TROPICOTE utilises a unique coating technology. Distributed evenly on the granule, this coating ensures the fertiliser resists absorption of moisture during storage and handling. Tests show that the coating can reduce the rate of water absorption by 99% compared to untreated calcium nitrates. When in contact with moist soil or after a nights dew, light rainfall or irrigation, YaraLiva TROPICOTE is quick to breakdown and release the fast-acting nutrition.

YaraLiva TROPICOTE is specifically designed for dry applied field use, offering a low risk of scorch it is often used as a final topdressing on a wide range of high value crops.

Benefits

- Supplies readily available nitrogen and calcium for high yields and superior quality
- Unique coating reducing moisture absorption during handling and storage, making field application easier
- Free flowing, dense granular fertiliser for accurate dry applied spreading
